MUHAMMAD ARSLAN

Full-Stack Software Developer

React.js | Electron.js | React Native | Node.js | Express.js | MongoDB
REST APIs | Web, Desktop & Mobile Apps

PROFESSIONAL SUMMARY

Passionate and dedicated Full-Stack Developer with expertise in building high-quality web applications, mobile apps, and desktop software. Skilled in React.js, Electron.js, React Native, Node.js, Express.js and MongoDB. Strong problem solver with a focus on clean code, scalable architecture, and great user experience. Eager to learn, adapt, and deliver innovative solutions that add value to businesses.

PROJECTS & DEVELOPMENT EXPERIENCE

1

E-Commerce Website

React.js, Node.js, MongoDB

Developed a fully functional e-commerce website using React.js. Features include product listing, category management, cart, checkout, user authentication, and admin dashboard.

2

Mobile Application Development

React Native, Node.js, MongoDB

Built cross-platform mobile applications using React Native. Implemented features like user authentication, API integration, real-time data, and beautiful responsive UI.

3

POS Desktop Software

Electron.js, React.js, Node.js, MongoDB

Developed a complete POS desktop application using React.js and Electron.js. Features include sales management, inventory, customers, reporting, and multi-functional admin panel.

4

Backend & REST API Development

Node.js, Express.js, MongoDB

Developed secure and scalable REST APIs using Node.js and Express.js. Implemented authentication, role management, data validation, and MongoDB database integration.
